PUBLIC NOTICE

PUBLIC NOTICE

Section 15.1-179 of the Code of Virginia - The Appomattox Town Council wishes to notify the citizens of the proposed Ordinance:

ORDINANCE

The Town of Appomattox is required by the 1977 Safe Water Drinking Act to construct, improve, enlarge, operate, and maintain a sewage disposal system with all necessary sewers, conduits pipelines, pumping and ventilating stations, treatment plants and works, for the purpose of relief from pollution and for improvement of conditions affecting public health. A new sewage control system and the improvement of existing systems is being required by the Environmental Protection Agency, (hereinafter referred to as EPA) and the State Water Control Board and without a new system and improvement of the existing system additional connections to the existing system for large users would not be possible.

Be it therefore enacted that the Town of Appomattox, under the provisions of Article VII Sectionn 10 (a) (2i of the Constitution of Virginia and Section 15.1-320, 322 and 323 of the Code of Virginia, borrow $800,000 for the purposes of establishing and constructing a sewage disposal system to be known as the Appomattox Regional Waste Water and Sewage Disposal Facility and for the improvement of the existing system and that such indebtedness be financed by the issuance of Interest Bearing Bonds in the maximum amount of $800,000 by the Town of Appomattox. The bonds and the interest thereon shall be paid from the Revenue of the sewage disposal system through charges to customers using the system and whenever such sewage disposal system should fail to produce sufficient revenue for the cost of operating and administration, including the interest on such bonds and the cost of insurance against loss by injury to persons or property, and an annual amount to be placed into a sinking fund sufficient to pay at or before maturity all such bonds, then such expenses shall be paid from ad valorem taxes or general revenue of the Town of Appomattox.

The maximum interest rate that will be paid on the bonds shall not exceed 6 per cent and the money realized from the bonds will be used for the construction, improvement, maintenance of a sewage disposal system with all necessary sewers, conduits pipelines, pumping and ventilating stations, treatment plans and works, and for the purpose of the issuing of bonds and expenses pursuant thereto and for the purpose of improving the existing wastewater and sewage facility. The bonds shall be for a maximum term of thirty-five (35) years or less.

Under the plan to be put into effect upon the construction of the sewage disposal system as aforesaid each existing user will experience an initial minimum increase of $11.50 per month plus possible additonal future increases. All new customers shall pay an initial hookup fee and thereafter pay a user fee that will be the same as for existing customers.

Be it further enacted that the question "whether the debt shall be contracted and whether the money to construct the sewage system should be borrowed and the bonds issued" shall be submitted to the qualified voters of the Town of Appomattox at a special referendum pursuant to law.

By Tom Conrad

Wheat Comments Due Aug. 6 - Plans are bing formulated for the 1980 wheat, barley and oats programs. Farmers and other interested prsons have until Aug. 6 to comment on proposals for the wheat program.

Comments should also contain opinions regarding wheather barley and oats should be included in the 1980 feed grain program, and whether program decisions on these crops should be announced the same time as the wheat program. Normally a decision on the inclusion of barley and oats in the feed grain program is made at the same time the corn and sorghum program decision is made, prior to Nov. 15. Since some barley is planted in the fall and does compete with wheat for the same acreage, Secretary of Agriculture Bob Bergland is considering announcing the barley and oats program along with the wheat program.

Before reaching his decision, the secretary will consider any recommendations and views regarding the amount of the national program acreages; the reduction from the previous year's harvested acreage required to guarantee target price protection on the total 1980 planted acreage; whether there should be a set-aside program and, if so, whether a limitation should be placed on planted acreage; whether there should be a land diversion program and, if so, the extent of such diversion and the level of payment.

Other program determination include loan and purchase levels for 1980 wheat, barley, oats and rye crops; the target price for wheat, barley and oats; whether the special acreage grazing and hay program should be implemented.

Public Comment Sought on Dairy Program Decision - The public has until August 20 to comment on the level of price support for milk for the 1979-80 marketing year which begins October 1. Secretary of Agriculture Bob Bergland is also asking for public comment on the prices and terms of purchase by Commodity Credit Corporation (CCC) of butter, cheese, and nonfat dry milk.

Current law requires milk prices be supported between 75 and 90 percent of parity. The law also requires the support price to be adjusted in the middle of the marketing year (April 1) to reflect any change in the parity index (index of prices paid by farmers, interest, taxes, and farm wage rates) during the previous six months.

Other Matters pertaining to the milk support program on which the secretary may make decisions and on which the public may comment are: the yields of cheese, butter and nonfat dry milk per hundredweight of milk; the manufacturing margins used in calculating the purchase prices of cheese, butter and nonfat dry milk; the allocation of any change in the support price for milk affecting the purchase prices set for butter and nonfat dry milk; whether to change the purchase price differential between fortified and nonfortified nonfat dry milk; and the level of the sales prices of CCC-owned dairy products.

EXCERPTS - The following is from a speech by John I. Morton, Director, Producer Association Division, to Bright Belt Warehouse Association, Myrtle Beach, South Carolina, June 12, 1979.

Over the past four years, CCC has returned to the Treasury $3.8 million by selling off loan tobacco for more than loans made.

Since 1933, losses from the whole tobacco program have amounted to $52 million. That might sound like a lot, but CCC's losses from all commodity programs have amounted to $50 billion since 1933. Tobacco's losses over the years amount to around one-tenth of 1 percent of the total losses to CCC from all commodity programs.

The tobacco program runs in a very orderly manner. It has cost the taxpayer nothing over the past few years. It has performed marvelously well when compared with support losses for all commodities since modern programs began in the 1930's.

The program depends on the flow of loan money from the Treasury through CCC right on down to the producer. The program is mandatory; but there's nothing mandatory about the appropriation that makes the program run.

The anti-tobacco forces have seen how the process works. Every year they have introduced an amendment to the appropriations saying that no CCC funds may be loaned into the tobacco support program. Every year that amendement has been defeated, but by increasingly narrower margins. Also, public sentiment becomes increasingly mixed year after year about a program for a commodity that is neither a food nor a fiber.

Secretary Bergland has made the point again and again that the tobacco program has been a very successful one for helping the small farmer to stay on his land, and I am personally convinced that the tobacco program is a good program and will survive.
